

PRE-ORDER

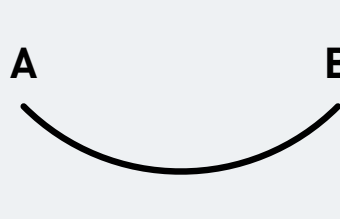

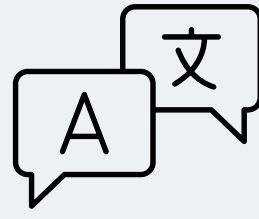

Increased demand on logistical activities such as the movement of medicines, specimens, and clinical supplies around a hospital is leading to delays to care in hospitals across the UK. By automating certain tasks, we can free up time for hospital staff to do the jobs that people do best.

THIS IS WHY WE INVENTED HELPER BOTS

INTELLIGENT HELPER SOLUTIONS

Drawing on our work in developing self-driving cars for the road, our Helper Bots use advanced vision technology originally developed for self-driving cars to navigate in complex environments.

Originally developed for use in hospitals, these Helper Bots can also be used in restaurants, cafes, offices or other busy indoor environments where you need to move things from A-B.

- 
Carry items autonomously from A-B securely
- 
Can be customised for different logistics needs
- 
Can speak multiple languages

HOW WE CAN WORK WITH YOU

Conduct a Pre-Trial Assessment

In order to supply the right solution for your organisation, we conduct a thorough pre-trial assessment to understand your needs and the specific challenges your environment presents for introducing this technology.

This is a one-off cost, which is discounted from any future purchase of our Helper Bots or from a paid trial.

Supply a single Helper Bot for a limited trial

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed diam nonummy nibh euismod tincidunt ut laoreet dolore magna aliquam aliquip.

Supply a group of Helper Bots

Once you're set up with your Helper Bots, we can provide a dedicated server and ongoing software upgrades and support for your Helper Bots.

For further information about our Helper Bots and how we can work with you, please complete the form below.
